ANNEX 3
ADDITIONAL RISK FACTORS

In addition to the risk factors set out in the Offering Memorandum, Investors should be aware of the following in relation to the Series 1031S.

In the event of a market downturn accompanied by low volatility, the strategy return will have a leveraged exposure to the Underlying. In such circumstances, if the Underlying performs negatively, an investor's exposure to such negative performance will be greater, and there is a higher risk that investors may lose some or all of their initial investment.

In the event of an increasing market accompanied by high volatility, the strategy return will have a lower exposure to the Underlying. In such circumstances, if the Underlying performs positively, an investor's exposure to such upside performance will be limited. In such circumstance investors may receive a lower return than they would otherwise have received.
